Question: Which attributes of the course and/or the professor helped you learn the material? When the course is next taught, what should be done in the same way?

She explained every topic in a way that made understanding the content easier.

She was very positive towards the questions and gave us time to think and ask our questions, which is great!

Showed lenience to pandemic, which helped encourage me to do my work even if it was a little late. This really helped to facilitate actual learning and made it a really positive learning environment that still challenged me to do better and push forward in the course material. Professor made learning materials really accessible and had great visual aids to accompany lectures

I could write a book on how well-organized this course was. Professor Sommerlot brought passion, experience, and empathy to this course that really helped me as a student learn all the material. Professor Sommerlot was brilliant in her professional insight and demonstrated the perfect standard for a university instructor.

The class was excellent, theres nothing I would changed. She kept us motivated during the entire semester. The classes were never boring and the material was easy to understand.

Question: Which attributes of the course and/or the professor did not help you learn the material? When the course is next taught, what might be revised?

No complaints

Sometimes, she was speaking a little fast and I could not catch the topic.

I struggled a bit with shifting between Canvas and Teams for materials, would like it if they were all available in one or the other or both

I would suggest that lecture slides with notes be included in modules. Professor Sommerlot did however provide a class recording for every class meeting.

None
